LACK OF UNITY

Lack of unity

1. This application contains inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rules 13.1 and 13.2 because the product claims 1-3 define three different inventive concepts with distinct technical features: the three polymerase chimeras having SEQ ID NOS:8, 10 and 12, which are structurally distinct from one another.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single inventive group to which the claims must be restricted.

The claimed inventive groups are as follows:

- I. Claims 1, 4-7 and 10-16, drawn to a polymerase chimera, the corresponding coding nucleic acid, methods of making and using the chimera and kit containing same, classified in class 435, subclass 194; class 536, subclass 23.1; class 435, subclass 69.1, 6 and 810, respectively;
 - II. Claims 2, 4-6, 8 and 10-16, drawn to a polymerase chimera, the corresponding coding nucleic acid, methods of making and using the chimera and kit containing same, classified in class 435, subclass 194; class 536, subclass 23.1; class 435, subclass 69.1, 6 and 810, respectively;
 - III. Claims 3-6 and 9-16, drawn to a polymerase chimera, the corresponding coding nucleic acid, methods of making and using the chimera and kit containing same, classified in class 435, subclass 194; class 536, subclass 23.1; class 435, subclass 69.1, 6 and 810, respectively.
2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
